

BRAND GUIDELINES V1.0

THE JS-PT BRAND GUIDELINES

This document been created to give JS-PT a unified brand voice for all internal and external communication.

It is designed to be expanded on, as the JS-PT brand itself grows. What’s included in this intial version constitutes a core direction to adhere to.

1.0 LOGO

The complete lockup of the logo with the tagline included, in the full colour execution.

1.1 LOGO VARIATIONS

To ensure the logo can work in all required applications, a series of variations have been defined for all usage situations.

1.2 LOGO USE

To further ensure the integrity of the brand, the logo must only be used in its intended format.

This page outlines key incorrect usage and breaching of intended use is punishable by squats and pushups.

1. Using a dropshadow on the logo
2. Presenting the logo in a non core brand colour
3. Breaking the proportionate ratio of the artwork in anyway
4. Placing the logo over an image with a lack of clear negative space

2.0 BRAND COLOURS

The brand colours follow a stripped-back, near-monochromatic direction with 'Modest Goal' as the feature colour.

For printed materials, the brand features K.W.Doggett Fine Paper's Buffalo Stock throughout.

The black fabric is also used sparingly as a feature graphic for both printed and digital executions.

4.0 PHOTOGRAPHY

4.1 PHOTOGRAPHIC STYLE

The photographic direction of the JS-PT brand should follow a clean, tasteful direction as its core.

An added treatment of warmth and boosted blacks (Toning absolute black down to more of a dark grey) are an added characteristic for the brand's photographic style. This can be achieved easily with editing software such as VSCO.

4.2 TREATED PHOTOGRAPHY

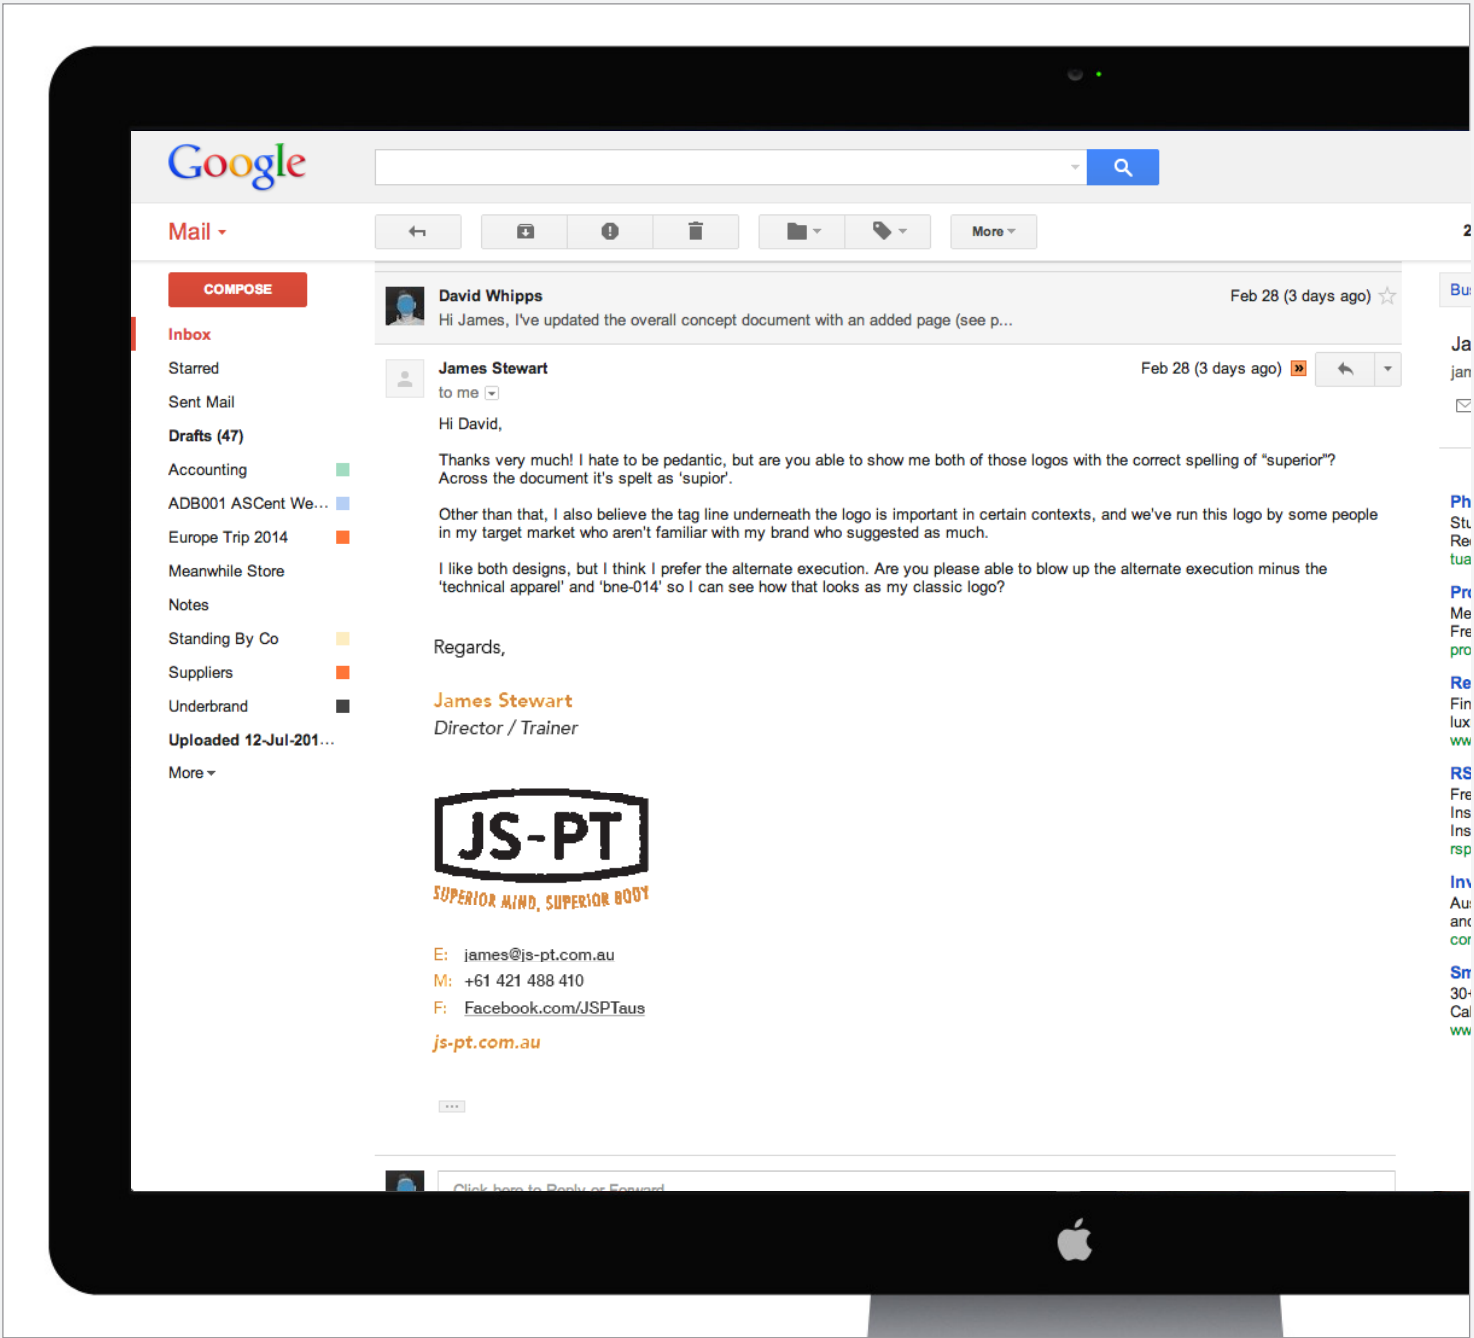

As part of the brand's character, a monochromatic tone should be selectively used where appropriate.

To ensure a consistent look, ensure all black & white treatments of photos have their blacks/shadows pushed up for a slightly faded look. See the images in the left column as example.

When B&W images are used as backgrounds to content (see website) ensure they are darkened for better contrast to the text sitting above it. The images in the right column have a simple black overlay with 55% opacity.
